

Week #	Dates	2019/2219	2029/2229
1	August 26 - August 30	Making Measurements and Analyzing Data	Introduction to Electricity
2	September 2 - September 6	Linear Motion	Electric Fields and Electric Potentials
3	September 9 - September 13	Falling Objects	Ohm's Law
4	September 16 - September 20	Force Vectors and Static Equilibrium	Kirchhoff's Rules for DC Circuits
5	September 23 - September 27	Simple Pendulum	Oscilloscopes and RC Circuits
6	September 30 - October 4	Simple Harmonic Motion	Magnetic Fields
7	October 7 - October 11	Signature Assignment: Expansion of Fluids	AC Circuits
8	October 14 - October 18	Fall Break: No Labs	Fall Break: No Labs
9	October 21 - October 25	Rotational Dynamics	The Refraction of Light
10	October 28 - November 1	Standing Waves on a String	The Focal Length of Lenses
11	November 4 - November 8	Sound	Interference and Diffraction in Modern Technology
12	November 11 - November 15	Ideal Gas Law	GROUP A: Atomic Spectroscopy GROUP B: Photoelectric Effect
13	November 18 - November 22	Heat and Calorimetry	GROUP A: Photoelectric Effect GROUP B: Atomic Spectroscopy
14	November 25 - November 29	Thanksgiving Break: No Labs	Thanksgiving Break: No Labs
15	December 2 - December 6	LAB FINALS	LAB FINALS
FINALS	December 9 - December 13	FINALS WEEK: NO LAB	FINALS WEEK: NO LAB
